# STEVE BONHAM AND THE LONG ROAD

## Short biog:

The Long Road were formed with a single mad idea to go back to the source to explore and reimagine what might grow out of the great musical roots of USA. Distil something original and powerful to make moonshine music!

## Longer biog:

The Long Road were formed with a single mad idea to go back to the source to explore and reimagine what might grow out of the great musical roots of USA.

A crazy notion to try distil something original and powerful from the elements that made some of the most potent music ever heard by human ears.

The band call it Moonshine Music: taking a few simple, authentic ingredients adding a little heat and magic to try to conjure up some rare, raw spirit.

Their music is definitely acoustic but of a powerful and stirring kind. Big melodies and great riffs abound and the stories they wrap round them are intimate and expansive, funny and moving.

“Ambitious, hypnotic, brooding, infused with sadness and joy, capturing the panorama of its physical and emotional canvas ... irresistible.”  
- Mike Davies, Fatea Magazine

“Make no mistake about it! Steve Bonham and The Long Road are a British band, but their interpretation of American styles is tantamount to anything their transatlantic brethren have released in recent years.”
